SUPPLEMENT TO  
REPORT NO.

1. The Ikarus aircraft factory is located in Zemun, on the immediate western side of the central railroad station, and it can be reached by air or by railroad siding from the station. Military personnel are in charge of the plant. The factory formerly employed 4,000 workers but this number has been increased to about 7,000. The factory makes aircraft of school and military types:

a. School airplanes: Aero-2  
Aero-3  
Pionir  
1 Maj  
20 October

Date:	30 AUG 1978
By:	CL

b. Military airplanes: Fighter "S-49"  
A twin-engine bomber of unknown model; perhaps a copy of the Russian airplane "Petlyakov"

4 The factory repairs the following Soviet aircraft models:

Stormovik  
Ilyushin  
Yak-2, Yak-3, and Yak-5.

2. The factory can produce a series of 50 school airplanes in 6 months; but the production capacity of military aircraft is not known. Few materials and parts are mainly imported; recently more and more from England. The engines come from the 31st of October airplane engine factory which is located south of Belgrade.
3. Engineers Sime Milutinovic and Zetovic are employed in the factory as designers. They designed the prototype of the rotary digging machine which had been made by Ikarus. Colonel Engineer Poljin also collaborated in the design of this prototype.
4. A plan of Ikarus factory is shown on the attached sketch and the legend is as follows:
